Bureau Veritas Services

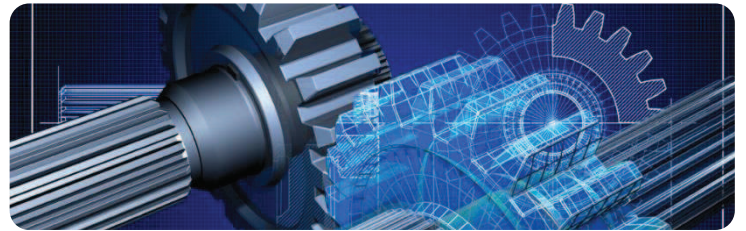

ENGINEERING SERVICES

Promoting optimised performance and equipment life.

SERVICES

The following specialist services are included as part of our Engineering portfolio:

- Mechanical engineering:
 - Boiler services
 - Piping services
 - Pressure vessel services
 - Welding services
 - Bulk material handling services
 - General mechanical services
- Structural engineering
- C&I engineering
- Industrial engineering
- Metallurgical (physical) engineering

BUSINESS CHALLENGE

With rising costs and margin pressures mounting across industries, companies are constantly looking for ways to optimise their operational capacity, maximise or extend equipment life, minimise equipment downtime, shorten product engineering, and mitigate performance and safety risks in the process. The challenge is to address all of these needs in an integrated way to provide clients with end-to-end, fit-for-purpose engineering solutions that will enable them to unlock the full value of their assets.

SOLUTION

We are a multi-faceted engineering solution provider, able to deliver industry leading, engineering focused consultation and physical asset management solutions. We offer an all-encompassing, one stop service.

Our team comprises multidisciplinary experts in mechanical, structural, control and instrumentation (C&I) and electrical, industrial engineering, as well as metallurgical engineering. We prioritise the values and interests of our clients with the aim of providing an integrated, end-to-end engineering and asset management solution through partnership with our clients, enabling a step-change in the way our clients manage and operate their assets.

Besides these offerings, we focus on developing innovative systems and solutions.

APPROACH

We understand that each of our clients' needs and operational requirements are different and that it is not prudent to offer one-size-fits-all solutions. We ensure that we understand our clients' requirements and constraints before suggesting appropriate solutions, be it a design or modification, monitoring solution, AIA review, analysis or whatever the situation requires.

The process employed in arriving at our solutions is founded on sound, best engineering practices and applicable standards; our approach and commitment to quality is non-negotiable.

WHY BUREAU VERITAS?

Established in 1828, Bureau Veritas is a global leader in testing, inspection and certification (TIC), delivering high quality services to help clients meet the growing challenges of quality, safety,

environmental protection and social responsibility. As a trusted partner, Bureau Veritas offers innovative solutions that go beyond simple compliance with regulations and standards, reducing risk, improving performance and promoting sustainable development.

Bureau Veritas core values include integrity and ethics, impartial counsel and validation, client focus and safety at work. The company is recognised and accredited by major national and international organisations and offers its clients fully integrated solutions.

Our dedicated client focus, safety and integrity form part of the company's core values. Client satisfaction is central to our client approach and contributes to preserving our long-standing, positive company reputation for delivering and executing leading mechanical engineering solutions. We deliver peace of mind, ensuring that every project is handled with utmost professionalism and reliability.

INDUSTRIES

- Chemical and petrochemical
- Food and beverage
- Industrial
- Mining
- Natural gas and steam generation plants
- Oil and gas
- Power generation
- Processing/manufacturing industry

CONTACT
